Domain Age Equivalents

Battelle Developmental Inventory -2ndEdition Explanation of Assessment Results. The BDI-2 is a standardized assessment instrument, meaning it is given the same way following the same instructions and procedures each time it is given. It is norm-based, meaning that scores are generated by the child's performance based on the performance of same-aged peers on the same items.

Welcome to BDI-2

The Battelle Developmental Inventory is one type of assessment commonly used to determine if infants and children are meeting developmental milestones. The milestones assessed include things such as when a baby first smiled, laughed, and learned how to sit alone. Developmental milestones are broken down into four general categories:
