Il volume raccoglie rispettivamente, le Relazioni e le Comunicazioni presentate nel Convegno romano organizzato in onore di John W. Hayes a poco più di venti anni dalla pubblicazione del suo famoso volume Late Roman Pottery, che ha costituito una pietra miliare per gli archeologi impegnati nello studio della tarda antichità. I cinquantaquattro contributi, articolati in analisi di singole classi, sintesi a livello regionale e presentazioni di siti o contesti, configurano un primo manuale delle produzioni ceramiche della penisola nel periodo della transizione tra tardo antico e alto medioevo, oggetto negli ultimi anni di un dibattito a tutto campo, nell'ambito del quale le testimonianze della cultura materiale occupano un ruolo di primaria importanza. La pubblicazione accorpa in un unico volume la prima edizione realizzata in due tomi

Presents excavation data and pottery finds from the stratigraphy underneath the cathedral of Siena. The surveys were conducted between 2000-2003. The ultimate goal is to trace a view of the settlement types and economic framework that has affected the hill of the Cathedral from the Classical age to the late Middle Ages.

Maskwork is a new way of looking at the art of masks and mask-making: a unique combination of ethnography, design and practical advice. Jenny Foreman's book for teachers and practitioners of drama, art, design and technology grew out of a research bursary from the UK's National Society for Education in Art and Design. They received her report with great enthusiasm as "one of the very best projects . . . likely to make a valuable and useful contribution" to both specific and cross-discipline school and college courses as well as to adult performing groups. The first part explains the anthropology, nature, use and meaning of masks around the world, from prehistory to modern times. Richly illustrated with colour and black-and-white photographs, this section introduces the ethical implications of free use of masks which have ethnographical connections - an important aspect completely neglected elsewhere. The second part comprises eight theme workshops, including theory, background and instructions for mask-making, supplemented by photographs of assembly and use by groups of people from all age-ranges. Materials are inexpensive and easy to acquire, while line drawings aid step-by-step construction. A bibliography and reference section helps readers go on to even greater understanding and achievements.

Al tema della Ceramica Altomedievale in Italia è dedicato il V Congresso di Archeologia Medievale, che si è svolto – come i precedenti – a Roma nella sede del Consiglio Nazionale delle Ricerche nei giorni 26 e 27 Novembre 2001 e del quale il presente volume raccoglie gli Atti, costituiti da 23 contributi di alta qualità scientifica. Il congresso si è proposto di presentare dei bilanci regionali di sintesi e degli aggiornamenti puntuali sulle ceramiche in uso in Italia nell'altomedioevo e specificamente nel periodo compreso tra l'VIII e l'XI secolo, da un lato quindi escludendo gli estremi esiti tardoantichi di VI-VII secolo e dall'altro arrestandosi al momento in cui appaiono quelle innovazioni tecniche che aprono una nuova epoca nella storia della ceramica italiana. Se ne è ricavato un primo sguardo globale sull'argomento, un originale panorama della situazione degli studi, basato su rigorosi scavi stratigrafici, classificazioni accurate e raffinate analisi archeometriche dei materiali, e attento alla totalità dei tipi ceramici presenti nei diversi contesti e periodi. Pur tra tante differenze, sono emerse alcune realtà consolidate e alcune linee di tendenza convergenti.

The nEU-Med project is part of the Horizon 2020 programme, in the ERC Advanced project category. It began in October 2015 and will be concluded in October 2020. The University of Siena is the host institution of the project. The project is focussed upon two Tuscan riverine corridors leading from the Gulf of Follonica in the Tyrrhenian Sea to the Colline Metallifere. It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean, which took place between the 7th and the 12thc. Central to this is an understanding of the processes of change in human settlements, in the natural and farming landscapes in relation to the exploitation of resources, and in the implementation of differing political strategies. This volume brings together the research presented at the first nEUMed workshop, held in Siena on 11-12 April, 2017. The aim of the workshop was to draw up an initial survey of research and related work on the project, one and a half years after its inception. The project is composed of several research units. Each unit covers an aspect of the interdisciplinary research underpinning the nEU-Med project, each with their own methodology. For this first volume of results, it was decided not to give an account of all the work carried out within all the units, but to select those lines of investigation which, at the end of the first year and a half, have made it possible to articulate and develop an interdisciplinary research strategy.

This collection of papers, arising from the conference series Late Antique Archaeology, examines technology in late antiquity. Papers explore agriculture, production, engineering and building technologies, and include a bibliographic essay.
