The LG-7500 Digital Electrical Muscle Stimulator is a proven way of treating muscular injuries, muscle atrophy, and rehabilitation. It works by sending electronic pulses to the muscle or muscles needing treatment. This causes the muscle to contract and exercise passively. Electronic Muscle Stimulators (EMS) are used for both medical treatment and cosmetic purposes (conditioning and toning).

One of the biggest goals in physical therapy is to have a non-invasive modality. Transcutaneous electrical nerve stimulation units (TENS) are a popular pain management device. With a TENS unit, two pads are placed over the affected part of your body. When activated, the unit emits an electrical signal.
