Unit 4 Electricity and magnetism. Notes. Since power is related to voltage and current ($P = IV$) and energy is related to power and time, $E = Pt$ can be rewritten as: $E = IVt$. $E =$ energy (J) $I =$ current (A) $V =$ voltage (V) $t =$ time (s) We simply substitute IV for P to get the formula above.

treatment of the fundamentals of electromagnetic theory and offers a sound platform for explorations of related applications (AC circuits, antennas, transmission lines, plasmas, optics and more). Written keeping in mind the conceptual hurdles typically faced by undergraduate students, this textbook illustrates the theoretical steps with well-chosen examples and careful illustrations. It balances text and equations, allowing the physics to shine through without compromising the rigour of the math, and includes numerous problems, varying from straightforward to elaborate, so that students can be assigned some problems to build their confidence and others to stretch their minds. A Solutions Manual is available to instructors teaching from the book; access can be requested from the resources section at www.cambridge.org/electrodynamics.
