Manual Mazda 3 Wont Start
Starter does not start. If nothing happens when you turn the ignition key to the "Start" position, the starter motor is not cranking the engine. Most often, this could be caused by a dead battery. If the battery is OK, but the starter still won't start, there could be a number of possible reasons. Here are a few:

Mazda Mazda3 won't start - how to troubleshoot
Mazda 3 Won't Start: Not Cranking. There can be many reasons why your 3 won't start. But, there are less things to troubleshoot than if it were cranking but will not start. Here are some of the most common issues that cause a vehicle to not crank: 1. Battery Cables. While the battery cables are not necessarily the most likely issue to cause your 3 to not start, they are some of the easiest to diagnose.

Mazda 3 Won't Start Diagnosis | Drivetrain Resource
Press the push button start to start the engine. The engine cannot be started unless the clutch pedal is fully depressed (manual transaxle) or the brake pedal is fully depressed (automatic transaxle). If there is a malfunction with the push button start function, the push button start indicator light (amber) flashes.

Once you have fuel at the injector pump, crack injectors 1,3,and 4. Crank the motor for no more 6 or 7 seconds at a time until it turns over. Give the pump time to cool for a couple of mintues between cranks. This process is easier with two people, one to crank and the other to watch for fuel and tighten the injectors once it starts.
