The “engrossing, thoroughly researched look at women who are in romantic relationships with incarcerated men”—fully updated with twenty-first-century cases (Publishers Weekly). In 1991, Sheila Isenberg’s classic study *Women Who Love Men Who Kill* asked the provocative question, “Why do women fall in love with convicted murderers?” Now, Isenberg returns to the same question in the age of smart phones, social media, mass shootings, and modern prison dating. The result is a

compelling psychological study of prison passion in the new millennium. Isenberg conducts extensive interviews with women who seek relationships with convicted killers, as well as conversations with psychiatrists, social workers, and prison officials. She shows that many of these women know exactly what they are getting into—yet they are willing to sacrifice everything for the sake of a love without hope, promise, or consummation. This edition of *Women Who Love Men Who Kill* includes gripping new case studies and an absorbing look at how the digital age is revolutionizing this

phenomenon. Meet the young women writing “fan fiction” featuring America’s most sadistic murderers; the killer serving consecutive life sentences for strangling his wife and smothering his toddler daughters—and the women who visit him in prison; the high-powered journalist who fell in love and risked it all for “Pharma Bro” Martin Shkreli; and many other women absorbed in online and real-life dalliances with their killer men.

This book provides a comprehensive introduction into the fundamental physics and

basic technical principles of automatic control and drive technology. It pays particular attention to the design and dimensioning of electrical feed drives in automation technology. It helps engineers and technicians to put into practice the theoretical fundamentals of automatic control and drive technology for machines in the tool, glass and ceramics industries as well as in the woodworking and packaging industries. It also deals with the application of robots and other manipulators. The relationships between automatic control and mechanical engineering are described and
