Small Wind Electric Systems | Department of Energy

This means that we are ideally located to benefit from domestic wind turbines. Harnessing the power of micro-wind or small-wind turbine systems wind to generate electricity, micro-wind or small-wind turbine systems in an exposed position, can produce more than enough energy to power the lights and electrical appliances in a typical home.

Home Wind Turbines - Benefits, Costs and Requirements

If you're just looking to power small devices, like the pump of an outdoor pond, then a small, mid-wattage turbine is adequate. Those with 400-1000W of power can charge small appliances like laptops, phones, lights, power tools and more. If you're looking to use a turbine in combination with an inverter for an RV, you'll probably need more.
